WHILE we are waiting for the float to get locked let me throw some DD @ your diamond balls to hodl.

Oh yeah GME is @ 85 wow. if you know market cap that is cheap AF...ONLY 6 Billion mkt cap is a joke

LUCID is 35B and they sold like 100 cars. THAT puts GME @\$600

NIO stock free falling over a year is 23B market cap still . = GME \$400

Alibaba- stock falling like a rock is STILL 203 B market cap \$75 - GME price higher than BABA is an illusion. GME would need to be at \$2800 to be comparable!

ZOOM -still 30 B market cap = GME \$500

Snowflake the cloud scam that only loses money is 50 B market cap - Again = GME \$800

TLDR= GME has a low ass float so higher stock prices are expected and it is STILL CHEAP AF

BUY DRS HODL
