While most of you wonder why ComputerShare has lowered the limit orders to \$3,500.00 the bigger question should be, why does it matter? I'll tell you why it matters, **\*\*paper hands\*\***. Now we realize just how many paper hands were planning on selling at a \$214.7K GTC30 order. Anything from here on out should be taken with a grain of salt because even though Reddit is **\*\*our media,\*\*** it's media nonetheless so here's where I sit (hopefully you sit here as well, I wouldn't know).

\* We aren't trapped in here with them, **\*\*they are trapped in here with us\*\***.

\* I didn't hold for a year just to cash out at \$214.7K and if you did, tough tit mouse now is the time to test those diamond hands under pressure.

\* We **\*\*knew\*\*** this wouldn't be easy, we are up against crooks who will pull all strings, even cut strings until hell so I'm gonna make it happen.

\* Last year every day we doubled, (Ex: 1,2,4,8,14) so with this in mind if we had last year's gamma sneeze movement, I'm talking moonshot Volkswagen style:

\* (Week 1: Day 1:\$150, Day 2:\$300, Day 3:\$600, Day 4:\$1,200, Day5: \$2,400)

\* (Week 2: Day 6:\$4,600, Day 7:\$9,200, Day 8:\$18,400, Day 9:\$36,800, Day 10:\$73,600)

\* (Week 3: Day 11:\$147,200, Day 12:\$294,400, Day 13:\$588,800, Day 14:\$1.177M, Day 15:\$2.355M)

(Again, this is if GME moved the same way as last year and nothing should be taken at face value this is just what I'm personally going off of since this is what happened in history. While it is happening we will likely see hedgies crying and throwing tantrums on TV and online so our entertainment will be phenomenal knowing those same people drank champagne with American families' hard-earned money and bailed out.)

\* \$3,500 is a joke for a price, I personally feel on fundamentals alone it's much higher than that.

\* \$10K in TSLA 2018 would've been worth \$1.2M today and that didn't have 50% DRSeD or 200%+ SI

\* The limit order is gone, crying about it will gratify them. Hold and stay zen, the ceiling is gone so now there won't have a massive sell wall at \$214.7K it will be **\*\*just up\*\***.

No matter what, we can trust the DD and we are watching every house of cards unravel. It's going to be more cutthroat for them to have all of this happen during a DOJ probe. Clearly, the end game is near and either BofA lacks liquidity (since they're Computershare's broker) or is losing liquidity daily (likely) and know how screwed they are. If anything, everyone should be excited that a sell wall is gone, the banks and centralized exchanges are losing liquidity, this whole month they're vulnerable to a gamma sneeze, **\*\*and we haven't even had our splivdends yet\*\***. Remember, stay zen, emotions are a weakness, and the DD has gone from theory to reality so enjoy this wild ride, **\*\*life is exciting\*\***.

**\*\*PS:\*\*** **\*\*Hey all you people at Citadel, go fuck yourself.\*\***
