Breaking Weather Systems

There has been a gradual increase in shill activity around the site now that the holiday weekend is over. There are two systems currently working through the forum including a new wave of ComputerShare_fud and a fud_system about space weather.

There were also eddies of crypto_fud and fomo_fronts trying to organize over the weekend. New counter measures by the mods were quickly implemented however. Shill_trackers and Fud_chasers in New also helped to keep the fud under control over the holiday weekend.

Now let's get a look at what's happening this morning! Over to you Dawn!

Today's Weather

[Over the weekend a Hype_bow was sighted after a DfV_nado ran trough the forum](<https://preview.redd.it/ov1zbc7pu1m71.jpg?width=700&format;=jpg&auto;=webp&s;=833bf8fd5524f43573c0476b28abf82ca55a235b>)

Gooood Morning Jim!

Here's what today is looking like so far across the sub.

- * News Postings: Light postings @ 2-3 PPH and increasing
- * SocialMedia Postings: very light currently but increasing up to 1-2 pph
- * Education Postings: Overnight posts were 2-3 pph but they are increasing
- * DD Postings: Postings have been week over the holiday but are returning at 1-2 pph
- * Shitposts: A **very** brisk 10-20 pp and expected to increase with the hype front moving through
- * Discussion Posts: Increasing but variable with postings up to 6 pph
- * The Daily: Brisk at 110-120 pph and increasing with 2-5 spp currently

****Thanks Dawn! Now let's get a look at the forecast for the day.****

Surface Level Forecast

<https://preview.redd.it/okks9k2uw1m71.jpg?width=1600&format=pjpg&auto=webp&s=0638e47c2dac9f224f1f44369dc9d94e0da595fc>

The level of posting in new is expect to climb back to it's regular levels- which I can't tell you right now because this is only day four. Check back tomorrow, and yes... I do keep a spread sheet and do rough napkin calculations by sorting if you're a data junkie.

Regardless- with the earnings call around the corner new is expected to have heavy waves of posting and a large uptick in shill activity today. Keep your eyes and ears peeled and stay frosty if your going to venture into New today and take your Shill_storm gear just in case.

Mid-Level Forecast

<https://i.redd.it/0ab2nl86y1m71.gif>

Rising continues to be a small narrow band of postings with no real current organization and a lot of vertical_mixing. We'll see what happens to Rising once levels completely return to normal.

High Level Forecast

<https://preview.redd.it/kmuytpxmy1m71.jpg?width=1050&format=pjpg&auto=webp&s=fa5dd2610861a75e7850097e532329074cd2a1fb>

Hot is currently filling up with large News_Banks in addition to the normal Meme and Hodl formations. Thankfully a High_wrinkle system has returned bringing more DD_banks to the area. As more apes return after the long weekend the High_Wrinkle System is expected to strengthen throughout the day.

Hopefully this will also help to disperse any remaining ComputerShare_Fud and Zombie_Data that has been clinging to the sub over the holiday.

<https://preview.redd.it/7m0hx1xrz1m71.jpg?width=360&format=pjpg&auto=webp&s=44bb261b99ae6a43f9676de3a2124c39186a426d>

We're also going to keep an eye on the inconclusive postings in the area which had died down over the holiday but look like they are starting to trend upwards again. If the trend continues it might indicate the a strengthening Shill_Stream in the upper levels trying to steer more fud into the forum. We'll keep our eyes on this as things progress.

The Daily Forecast

<https://preview.redd.it/7lhvnp9212m71.jpg?width=630&format;=jpg&auto;=webp&s;=bddc59a9b5dd5141c5598fa32c6159f487773a4d>

The Daily is already up to 120 pph with a skill rating of 2-5 spp currently and the volume is only expected to increase throughout the day.

A **very** strong area of hype is already building in the daily and it is expected to continue the trend until market open at 13:30 Zulu.

Watch for strong updrafts of excitement in the area as well as Fud_Devils. Skill_fronts are also expected to increase. Also be careful with data streams in the area. Data_Inversions leading to Fud_Mirages can occur without warning.

Remember apes....

This is going to be a big day and full of a lot of sentiment_Fronts moving through the forum so please be prepared and stay level headed.

All conditions are nominal and forward looking as of 10:00 Zulu on Tuesday the 7th.

Spotters are active and Wrinkle_Net is tracking systems as they move through the forum.

Please remember to use your Fact_checkers and zen_brellas.

A happy place and a strong thesis is suggested in addition to your regular gear.

If anyone has any suggestions, hints or just wants to send in spotter reports of disruptive systems in the forum just let me know.

Ape/Llama out!
