I don't keep up.

is there a bullet point, 30,000' view, unassailable truths recap wandering about to update my mental map of GME?

I own a little. 95% on CS. I like the meme/fuck the system/wall st silver/derivatives unwinding would be unimaginable storyline. but I don't check in often.

There was a something where now I have moar shares worth less. Somehow that means a thing. Or doesn't. Something is about to happen. Or isn't.

Is there a basic consensus on where we stand - what timeline were traveling down - what's anticipated?

So much here is regulars who keep up and it quickly becomes a sea of insider baseball and jokes. Hard to swim through. Where's the basics in a fairly up to date way anymore?
