Hello are you interested in the opportunity to generate passive income from your Direct Registered GameStop Corp. Class A Common Stock shares. Recently there has been a situation forming where investors are withdrawing their shares from lending pools and not selling them. To increase liquidity in these transfer agents, my employer is subsidizing the sale of DRS'ed shares. For each sold share from computershare, you can make an extra 50\$! There is a maximum of 40 shares per month, so you can make 2000\$ a month doing this. Once you sell them, you are allowed to repurchase them and continue this on a monthly basis. Please respond with serious inquiries only and have a nice day!
