Let me introduce myself. I am an Asian ape from Hong Kong. It has been a few days since I joined this community. For quite some time, I've had this idea in my head and someone from Hong Kong finally took action on it. Through the NFT project, real apes from around the world were brought together to form an international community. There is a great need for upstanding US forces to join and support the Asian APES force, share real DD, and give the apes some positive energy as we battle the fuxking hedge funds.

Real apes should definitely check it out! All you need is to submit DRS proof to get whitelisted.

During the verification process, their mod team didn't ask for any confidential information so I don't think there's a possibility that our personal info would be getting out. Ask them questions about GME, and you will be able to determine if they are really GME strong holders. There is no risk to you before minting since the project is only a few days old.

There are already tons of NFT projects utilizing the Ape theme, so I asked one of the mods in Discord why they would still use it. The answer was simple, only ape can truly represent GME SH holders against the fuxking hedge funds. NFT was created to encourage people around the world to use DRS and share real information so SS can come sooner.

Be sure to do your own DD.

DRS is the only way! Buy. Hold or Hodl.

This is not financial advice.

I am neither the owner nor associated with the project team.
