Is it possible that the split was orchestrated in a way to intentionally cause confusion for the shorts/brokers/dtcc by rc & co?

The vote not too long ago, allowed for additional shares to be “splividend” above the 4:1 that occurred. Maybe a 2nd splividend will occur, this time without the necessary time constraints for the first one & distict verbiage.

Also, knowing the confusion wouldnt be taken well. Drs-ing is now at a all time and will continue to rise.
