1 - Thanks

2 - My idea for the DAO

3 - Explaining what it is

4 - How to actually set it up

1 - I am a business student and am researching about NFT's & metaverse projects for 12 hours a day for the past year. I have seen so many opportunities where if I pulled my money from gamestop and put it there I'd see it at least 10x. But I didn't. I kept the hold. As I check this sub, I'm just filled with sincere happiness.

I will hold for years. I don't even want MOASS necessarily. I just want the satisfaction of holding and being part of the fight. MOASS is just extra for me. Benefit of belonging to such a group gives me more joy than the 10x I'd had with the NFT launches I've missed.

2 - I've been researching about DAO's (Decentralized Autonomous Organizations) in the past 3 months extensively, and with the events that might occur once it takes off (shutting down reddit or banning the subreddit), **we HAVE TO have our own means of communication & gathering**.

I know gangnam style video comments is funny, but we need to gather at a decentralized place.

Only people with GS shares should be able to enter after being verified by admins so we keep the skills out.

It's mindboggling that we still haven't done this.

3 - If you don't know what a DAO is, let me tell you very basic ape terms:

****Web 2.0 > ****

Zucc control all. Zucc see everything. Ape exposed. Ape account is not his, Mark can delete.

Ape say GME on twitter. Dorsey throw tree and shadow GME. No freedom of speech. Ape angry.

New ape go to google. Hides search results. New ape can't find data. Ape blind. He no find the monkey tribe.

Go to reddit. Bans sub. FUD. He panicc. Don't have info.

****Web 3.0 > ****

Fuck Mark. Internet belong to Ape.

Zucc can't delete. Freedom of speech.

Organization ruled by ape. All apes have banana. The banana gives vote. If want new rule in jungle, use banana. If %51 ape eat banana, it is rule.

We own the forum. True democracy. Rules decided by apes. Auto applied by jungle spirit.

\>>> Reddit will have to become a DAO or die anyways. These centralized systems will perish. We will go to this format. It's just a matter of time. We should do it before the MOASS to be prepared for the anti tactics of Kenny boi so he can't disable our communications.

Sun Tzu - Art of War -> one of the most important tactics is to disarm communication of forces.

We are not an organized group, but individuals owning a stock they like. But we need to have an independent forum to lower the risks on our behalf that we can control, and move to a blockchain ASAP !

4 - How to do it.

I'm not a programmer myself. But I'm sure there are lots of people here that are.

We can use Aragon, Syndicate, Colony to start it off and implement smart contracts as we progress.

We should develop a prototype to test it out first, then call all the apes to the new platform. It will be governed and OWNED by everyone. (this is the most important word in this post. ****OWNERSHIP.**** The internet is owned by big companies that can easily be manipulated. But if we have it, nobody can interfere. ****NFT's and DAO's gives PROPERTY RIGHTS of the internet to us.**** Insert - look at me i am the internet meme)

We can use the rules here and embed them in smart contracts (code on the blockchain that can't be changed, and auto execute themselves without any interference from outside.)

I'm just throwing the idea out there, if there are any apes interested, we can further discuss this.

As I said, I'm not a programmer, but we can collectively develop the concept together, which is actually the soul, philosophy, and purpose of a DAO.

We have to change our thinking to this way. Because as you've seen the last year, once we combine our intelligence, we can open up the deep financial corruption of the f**ing USA. And much more.

Once we unite our powers, the big bois are scared.

****Remember, they are scared. We are winning.**** We just have to push through and stick it into their gut with this move, in addition to the thousand cuts they get every single day.

Thank you, and I'm open to hearing criticisms, advice, ideas about this new format.

Have a great day.
