Sup Apes & Apetes

Happy Friday! For me it's pay day which means it's time to purchase shares through computer share. I am by no means wealthy for the most part I'm just scraping by so on payday I check my bills and find out how much I can put towards GME. In most cases it's \$100-\$300 (usually the lower), but I will make a purchase none the less. Getting to the point the reason I buy my stock through CS is because I no longer trust the brokers and you shouldn't either. RC purchased 100,000 shares on a lit exchange and we saw the price jump up 30% during the day & another 20% in after hours. Apes have at least 125,000 CS accounts meaning we can make that movement by purchasing 1 share per week through CS. 1 F'ng share per week. If you want to slay a dragon you use a double edged sword and purchasing shares through CS gives us a double edged sword. If you like killing hedgies with a slow death continue buying through FUD-elity and watch the price drop, because the price is fake. Apes need to fight this fight together and end the war faster by purchasing on a lit exchange. DRS'n is the way, but we can slay the hedge funds faster by purchasing through CS directly.

So not to mislead anyone purchasing through CS takes 3 days for your trade to go through, so sometimes the price goes up & sometimes the price goes down. For me personally I've had 2 purchases where the price went up & 2 purchases when the price went down.

For me I'd like to see MOA\$\$ be today & not tomorrow... Be the change!

Stay safe, invest only what you can afford to lose & do your own research!

Peace out!
