First things first: I am like the rest of you - I don't know shit. Remember that. Now, onto my post.

Like most of us, I eat, drink and sleep Gamestop. I even dream about Gamestop. Often, puzzle pieces seem to fall into place while sleeping, that don't make sense when I am awake.

I have a crazy(?) theory I want to share. I am happy for anyone with some smarts to poke holes in it.

1. We know that Loopring keeps posting about decentralized finance, we have seen their tweets about restructuring the global financial system, hinting about a blockchain style stock market.
2. We know that the DTCC is making moves to have a blockchain settlement process. Their website has a page devoted to it, with several press releases mentioning the work they are doing. They claim to be testing the system, with success. Main Page: [Blockchain | DTCC](<https://www.dtcc.com/blockchain>)

Look at this: The Enterprise Ethereum Alliance (whatever that is) has accepted DTCC as a new member.

So... finally, here is my THEORY, or maybe it is just a hunch. I think Ryan Cohen, as a MASTER DISRUPTOR with a TON of LEVERAGE (via all of us holding our real shares with the power to turn over the whole apple cart known as Wall Street), has made a deal with the DTCC to install blockchain technology into the DTCC.

I don't think the DTCC is looking to compete with Gamestop/Loopring/Gmerica... I think a deal has been struck for Gamestop (perhaps as a spinoff GMERICA) to provide settlement services via the DTCC.

I think that is what all the waiting has been for - testing and switching over. I think that is what the "glitches" we see can be attributed to, as well.

Insert the Look at me meme - I am the DTCC now

I may just have an over-active imagination, we'll see. Whether I am wrong or not - BUY The DIP, DRS The Dip. and sleep easy knowing that Hedgies R Fuk. This only ends ONE WAY, Hedgies have NO WAY OUT. MOON SOON.
