Howdy fellow apes and (newly minted) NFT enthusiasts.

Here's a thought, which is in no way financial advice: if you've been fortunate enough to get in on the ground floor of some of the exceptional collections live right now, why not take those lovely earnings and reinvest the entirety of them into new marketplace NFTs?

For me, I allowed myself \$XX to spend at launch in support of my favorite company and some cool projects. That \$XX quickly became mid \$XXX and I have no intentions of withdrawing (don't even know how to on the GME wallet, lol).

So, I'm slowly buying up all sorts of other, fun, exciting NFTs across a spectrum of collections, if for no other reason than to "pay it forward" to my fave company and the fantastic launch creators. And of course, to hodl.

Any other apes with me? :)
