

Title: Ape historian series: MSM- if GAMESTOP is not the play, why publish 500 articles A MONTH shitting on it? why? Why publish 300+ articles after the shorts closed? every month? Why? DRS

# "They are rage, brutal without mercy. But you. You will be worse. Rip and tear, until it is done" (Doom quote). -- i think this summarises MSM vs retail pretty well. they are brutal. and you will see just how brutal i think below (speculation but please offer a counter argument).

there is a lot of data to sift through and its still classifying as we speak. please do mark this post for yourselves because i will be adding links here and making a miniseries from what i found.

TLDR:

1. look at the MSM goes brr after the "sneeze" and after hediges closed- start asking yourself why-watch video for full effect = it starts tracking from november.
2. Computershare was effectively DROWNED out from january. apes knew about it but in the attack it was hidden. DRS is probably the way although none of this is financial advice. i am just going off the data.
3. There were just 1600 out of 77 MILLION posts and comments that even mentioned computershare before june 2021. many on the old sub. - we all know what happened to the sub.
4. I will be updating this post with lots more data.
5. I am building a site - [elegant-remote6667.com](https://elegant-remote6667.com/) that will hold everything - site isnt live yet but if something happens - that will be a repository for the dd. for sure.

first off lets have a look at the MSM coverage for GME, eh?

how can i do this? i have the data (below).

[i think i have most posts and comments that i need now for Nov 2020 to June 2021 -thats a GZ compressed size, so its really close to 150gb in size that export...](<https://preview.redd.it/i65412x6iha81.png?width=648&format;=png&auto;=webp&s;=6601374e71c35ec9784a00bac85bd62b4318cd9d>)

i think i have most of the data now that i need and will actually need to start thinking about replacing one of the SSD's in the array...

[ssds go brrrrt. he still has 70% lifetime left, apparently.](<https://preview.redd.it/5x17b8e8iha81.png?width=709&format;=png&auto;=webp&s;=2d9e451dc5e906f31ac0afa8c46576008ab0af41>)

# ape happy noises with data:

[cpu goes brrrrr](<https://preview.redd.it/roup4g2aiha81.png?width=1362&format;=png&auto;=webp&s;=4b5142aa17ae9467571b94aff6af8cf58074a32b>)

[python goes brrrr-happy ram noises.](<https://preview.redd.it/qog7on1biha81.png?width=736&format;=png&auto;=webp&s;=1e6e044531d5ec9bb4b67dcfb0b977e1a9546c31>)

# With me so far? we are ready.

# Total computer share posts and comments across ALL subs Nov 2020 to June 2021.

[all computer share convo up to June 2021. - yeah - not much.](<https://preview.redd.it/xq2skc4fiha81.png?width=638&format;=png&auto;=webp&s;=836e2de570ac05386c02b5351bf371707557abbf>)

# looks good right? plenty of posts and comments?

all non computershare convo up to June 2021... 77 million posts and comments. As above. across ALL subs (including the one that was compromised the one that many have or haven't jumped to, this one etc..) you get the point.

# so the ratio of computershare vs non computershare conversation is basically zero. 0.002077922% - fuck. they hid it well by spamming older subs before the s.sub and g.subs. fuck me. but I think the wrinkle-brained found it in the end.

# Computershare was known to apes in early January 2021, and I quote

# "that is a myth - the only way to prevent share lending that I know of is direct registration through computershare or physical certificate issue" - from a w333s333b333 ape. January 2021. You all remember what happened in January and February.

I collected a fair bit of data in the last year and now approaching a almost complete set of data to be able to do this.

I am confident I have 100% coverage up to June 2021 now and have about 98% coverage for the rest of the year. - this assumes that there are other news stories that I didn't miss of course - anything that wasn't posted on reddit wasn't collected. - so there may be even more - who knows.

# MSM goes brrrrt on FUD and GME coverage (negative mostly mind you) - this is how it looks like: bars are monthly

[totally reasonable to have one article a day on GME \(\Dec 2020\) - but to have almost 15-20 articles a day on GME since Jan 2021-sus as fuck.](<https://preview.redd.it/ot645mfziha81.png?width=1960&format;=png&auto;=webp&s;=417893b664145467d11c1d7d9558311fe685fb0d>)

EDIT: 3 hours after this post a few vocal people asked - well how does it compare to other stocks?

How does this compare with other tickers I wonder? -LET'S FIND OUT (Full analysis later)

[computer stock MEEKROSOFT \(\dont know if automod hates it or not\)](<https://preview.redd.it/jfbw56ou9ja81.png?width=1294&format;=png&auto;=webp&s;=7534411a993fba634bdbb39cd5fe1cf0a68df8ec>)

What about the graphics card manufacturer?

[graphics card \(\NV\\_IDIA\): 14 articles.](<https://preview.redd.it/gm5rb4gx9ja81.png?width=1338&format;=png&auto;=webp&s;=72302c98284b99aa4156196a1f8e0a887b64a3da>)

I remember cramer said coss is great right?

[koss. clearly this isnt all the articles across absolutely every single subreddit- i did the top 3 non gme chats in 30 seconds rather than 6 hours. But i will repull the last 5 years of data and see what the true differences are.](<https://preview.redd.it/j1lwfls0aja81.png?width=1327&format;=png&auto;=webp&s;=76d9e9e44e812a3ff56b12eb085a55b19d365419>)

this isnt the final picture,

This post will now serve as the back up of ALL the DD.

I will be updating it with links below as I go to gain access to the decentralised archive.

# Data will live here once the rest is classified.-check my previous posts if you are interested but for now i am collating the last year of my researching into one post.

notes for me for now:

will update in full:

- \* methodology
- \* how to dl data (all posts, links to msm articles, everything)
- \* any other points that come from comments.

IT is perhaps that DRS may be the way , but this isnt financial advice.

Ape Historian
