We are excited to announce a strategic partnership with FTX US to help shape the future market structure for digital asset securities. The philosophical alignment between IEX and FTX was clear from my first meeting with Sam Bankman-Fried. We share an optimistic view of the future and how both crypto and blockchain technology can reshape the way many industries operate. We also, importantly, share a view that smart regulation can be a catalyst for future growth and will be a key factor in the digital asset sector reaching its full potential.

As always, the conversation starts and ends with our regulators, who we will work closely with to create a market structure that protects investors and supports innovation. This includes ensuring market structure evolves so that systems are reliable and sustainable, and the market remains transparent and efficient, which is identical to our philosophy operating a national stock exchange.

This is an exciting new chapter in the IEX journey, and we look forward to sharing more soon.

- Brad

IEX

@IEX

A note from our CEO Brad Katsuyama.

Replying to @IEX and @SBF_FTX
Any chance you can get Fidelity to stop routing my orders through @citisecurities when I try to route them through IEX? Thanks.
