Larry Cheng just [tweeted](<https://twitter.com/larryvc/status/1454287518648705027/photo/1>) this. (Photo for those who don't twat)

<https://preview.redd.it/rmdmxde78mw71.png?width=600&format=png&auto=webp&s=cf5685ff0a3b4ec6a7e1285b3bf8fa6ec8acbc81>

That McDonald's cone tweet by RC months was often speculated to represent "MacD", as a leading indicator that crossed over. I know many have suggested this, however if you haven't seen it then this post (sorry can't link outside of the sub) [u/chayse1984](#) gives a little background.

[macD crossover may be leading indicator](<https://preview.redd.it/83n55e8afmw71.png?width=696&format=png&auto=webp&s=ba2d07a531cdd4168b839e17dac363026e3f1745>)

Now technical analysis and charts aren't my thing, so if there's an indicator that brings BK to mind from your delicious brains here please chime in. If we assume that McDonald's = MacD is the case for a moment, then what could Cheng be alluding to?

Recently a bit of odd info that's come out is in regards to a ticker BRK (Berkshire Hathaway). BRK is close to BurgerKing ya? We saw odd movement for BRK-A and spike after hours recently, but did you know BRK-B has some repetitive oddities precisely every 3 months? Check it out

[Notice the Red Volume spikes every three months at the bottom of the chart on BRK-B](<https://preview.redd.it/iolrb2rn9mw71.png?width=986&format=png&auto=webp&s=e9ddd5896c136f72a9d3f3ba93d09620421a483>)

Now what is the difference? between brk-a and brk-b? "The only differences between brka and brkb is their traded price and one feature BRK.A shares have — that they can convert into BRK.B shares anytime they want, while BRK.B shareholders can never convert their shares into Class A shares." - GreeneryFinancial.

Is cheng potentially saying BRK volume is a better leading indicator of a GME run up than MacD? -

Let's look into it further. At a cursory glance it seems for the past year or so that about every 2 months and 10 days after a volume spike in BRK-B, there is a subsequent run up in price of GME.

12/14/2020 BRK-B V Spike	02/24/2021 GME price run up
03/19/2021 BRK-B V Spike	05/29/2021 GME price Run up
06/18/2021 BRK-B V Spike	08/28/2021 GME price Run up
09/17/2021 BRK-B V Spike	*11/27/2021 GME price run up????

[GME Price over the past 1 year interval](<https://preview.redd.it/29f1ttubcmw71.png?width=1203&format=png&auto=webp&s=4c7f2c81097b83472618c58eb54c3ef7e2e6f8ed>)

Looking at the volume and price correlation, to me, looks like November 27th 2021ish, based on the last increase of volume of BRK-B (which was 9/17/2021). I believe that also falls in line with approximate dates of run ups with some other posters.

I did look back beyond January 27th of last year and while i found small volume changes on BRK-B, I personally couldn't see one for GME january spike.

Thanks for taking a look, I'm sure there will be brains which are able to break down this a bit more, but hopefully if nothing else this can foster some discussions.

thanks for u/smizzleface for the posting Chengs tweet inspiring this post.

Edit1 :

So I've updated the timeline for a more accurate date based on BRK-B increase in volume, check out the new chart. If we are more specific to 2 months and 5 days after an increase in BRK-B stock volume, we get a run up almost to the day. In fact it DOES include the January run up. So based on this , we would see a run on Nov 22.

I've included a new chart overlay here [Blue line is 2.5 months from BRK-B volume increase](<https://imgur.com/a/qvAwVte>)
