🔥 Stop unpinning the GME daily 🔥

That's the shitty thing about options having been so taboo for a year. If hundreds of thousands of people had been intelligently utilizing monthly and quarterly options, it would have exacerbated every swing GME has experienced over the last year, and could have contributed to capital growth to actually exercise in cash, LEAPs. I've said it before and gotten downvoted for it, DFV bought calls and sold the contracts back for 9 months before he ever exercised one. Why? Capital growth.

yes! i was on the fence about call options ... my brain has few wrinkles. and i'm poor. however, i've decided to buy my first call. it will be a bit out of the money (so i can afford it). i know that the discussion is about atm calls, but i can't do it. i'm betting on the fact that other more gilded apes will buy atm calls and hopefully this will put my cheaper call in the money. if this happens my plan is sell to exercise and drs the shares i get. honestly with all those puts (that appear to be a part of the married puts hiding shorts) that expire on the 21st. i'm making my bet for after. we'll see. i'll most likely lose the premium, but that's it. this will not destroy me financially!!! that was the worry before, but it has been allayed.
