Is\_self: False

Alice: " $\frac{d}{dt} |\Psi\rangle$  describes the dance of this possibility wave. In other words, how this possibility wave changes in time.  $\hat{H}$  contains the sum of the energies of everything there is including their interactions. Schrödinger's equation says that the dance of possibilities is choreographed by the energies of the universe."

*This is absolutely amazing. How on earth did Schrödinger guess this equation?*
