Like the title says, called and started drs transfer of 2/3 of my total holding. I told the guy that answered that I wanted to drs some share and he responded "GameStop, right?" I said "How did you know?" To which he responded, "You're the 4th call I have had today for the same thing." He warned me that trying to sell these shares might be problematic, but I let him know that I will not sell these shares, EVER! Hahahahaha Went pretty smooth and I was done in 15 minutes. I had to talk to a back office guy because my account was linked to my company espp, but he got it going very quickly. I do like Fidelity and my other shares will stay there until I see my phone number for a price, 1-900-976-9999. ■■
Glad I did it, very painless and the best thing to do. Stay classy San Diego?
