Hello!

So I DRS'ed my GME shares a few weeks back and decided to look at how the ComputerShare website is set up to get familiar with it.

I went to Activity > Transactions > look under GME > DRS transaction > View Details.

The page redirected and shows the Share Lot Details with the original Date, Number of Shares, & Cost Basis.

When I cross reference my statements from 2021 with this, there's a few things that are funky.

\- The original Date is sometimes off (I'm assuming it's an off by 1 error with timezones, so this isn't that big of an issue).

\- The number of shares seems to match.

\- Cost basis doesn't seem to match at all. Even if I try dividing the statement's cost basis by four, it doesn't match.

Is anyone else getting this?

I sent a message to ComputerShare, but I expect it'll take a couple days to get a response.
