Listen up smooth brains. The only reason Computershare has sell limits at 3,500 is because we are currently far from that price point. As the price goes up, so do the sell limits. You will always be able to sell at 3 percent above or below the price of GME.

Things to keep in mind.

1. DO NOT SET SELL LIMITS TO 3,500 RIGHT NOW. That will just create a wall and make it harder to pass that price point.
2. NEVER SELL WITH A MARKET ORDER! Unless you are content at possibly getting pennies on the dollar.
