This information is too long ago for many of you young pups. It might feel like a reference to a distant unrelatable time.

Article cited: ["Piñata Theology" 1991 article](<https://www.crisismagazine.com/1991/pinata-theology-the-sandinistas-preferential-option-for-the-rich>)

GME is a complicated issue, because it represents a struggle against abuses by financial insiders and the highly wealthy whom have robbed THE PEOPLE of property and privilege via piracy and imposture.

This time in GameStop history echoes. The Sandinistas of Nicaragua way back when revolted against a government that lavished politicians and fostered egregious wealth disparity. Politicians treated state property like personal property. Wealthy business owners had their way while disregarding the needs of ordinary citizens or the rights of future generations to uncorrupted land and trustworthy leadership. The article mentions the entrance and exit of the Sandinistas as a time marked by rapid inflation and profit taking by cronies. It was an epitaph article that attempted to show not difference in outcome between the government overthrown and the Sandinistas, because both divided luxuries amongst insiders without proper regard of others' supposed rights.

I am not Nicaraguan, so I cannot give a relevant opinion about that conflict. However, Ryan Cohen's latest twitter post could be an attempt to rehash in public discourse the idea of treating state wealth or positions of trusted office as something to finagle for private enrichment in offense of THE PEOPLE.

Read the cited article. You'll get it. Notice how the bankers and swarthy business tycoons were treated as undeserving victims and due the property they want to claim.

- \* "Virgin of Guadalupe! Everything has been stolen!" - Violeta Chamorro, April 25, 1990
- \* One year after leaving office, the Sandinistas are Nicaragua's real \*nouveaux riches\*.
- \* ... Sandinistas were "extreme romantics." "None of us owned anything," he asserts.
- \* The word \*piñata\* has entered Nicaragua's political dictionary to describe how the Sandinistas pillaged state property between February 25, 1990, when they lost the elections, ...

Context must be considered.

Ryan Cohen's message was unclear, because it could be applying this historic knowledge seriously or sarcastically. GME investors will bias interpretation to regard the current corruption as implicated. RC's words could also be a warning to those bringing the revolution, though. As if to say that you will be examined.

The battle for the soul of the country will never cease.

Remember that all economic theory boils down to an opinion about \*\*who is deserving\*\*. There are many questions that arise from this, but I will leave that rabbit hole for y'all.
