ever feel like "democratic" politics are just theater and have very little to do with what actually goes down? thats because it is!

A model carried right over from the monarchies/feudalism of Europe.

The Federal Reserve like to act like it's a government body. It's not – a card it likes to play whenever anyone in government or otherwise questions it. It's a legally private organization that serves of as the vehicle of transferring wealth from the populace to their overlords (new nomenclature, same bullshit).

It controls the money supply. The government does not control the money supply. I repeat: a *private* organization has the authority to print US government backed currency and has no accountability to the government or the people.

It's feudalism 2.0. It needs to be abolished. Abolish the Federal Reserve

margo robbie isnt in this one, it's not sexy, but if you watch it, you will fully understand how the federal reserve is really in charge, and everything else is just confetti
