First, for those who don't know me, I'm the guy that comments and cheers on 90%+ of purple ring posts. I'm xxxx all in GME, 100% DRS (I used computershare flair so you can check the bot comment for proof) I've been here since January. I'm on here many hours a day every single day. I love encouraging and helping others. ■■■■. If you have questions or concerns, please comment or PM me and I will have, or find, the answer for you. Every single reply to this will get a response.

I'm going to keep saying this: There is nowhere near 700,000 of us on GME subs. The vast majority of 'accounts' are bots, shells, dead accounts, and multiple accounts. I think it would be very generous to say there is even 300,000.

On the subject of the number of CS accounts ... yes, the high score account number being 116xxx means there are 116,000 account NUMBERS. However, there are many apes with 2 or more account numbers. I've spoken to many apes that have 3-6 different account numbers! This is exactly why roid_rage_smurf (DRSBOT guy) has added the new CSX feature. PLEASE support this! Simply go back to your original CS post and comment:

!DRSBOT:CSx!

where x is the number of different CS account numbers you have.

*****After collecting data from the first 554 apes that submitted a CSX number, the number of accounts per ape is 1.37. This reduces the 116,000 CS accounts based off of the high score to actually 824,671 unique ape CS accounts. (Maff=116,000/1.37)

This is why BOT and CS.net numbers were so far off from GameStop's earnings release number of 5.2M on October 30!!*****

IF I am right, and there are less than 200,000 of us on Reddit and/or if many apes will never DRS, then we are approaching a point where the number of new CS accounts is going to come to a grinding halt. Then we'll be relying predominantly on new purchases to lock the float. You can already see on u/stopfuckingwithme 's high score post graphic, that the number of new CS accounts are substantially dropping.

Next, all too often I see posts using ~33M as the float, but I'm convinced that is wishful thinking. Existing shares of ~75M minus insider shares of ~16M (even IF all of those are registered) = 59M shares that probably need to be DRS'd. Do you really think hedgies can't use NON-DRS shares (institutional, mutual fund, and ETF) to continue their manipulation?!? So, even IF there are actually 300,000 apes on Reddit, the average number of shares per ape would need to be 197 just to lock the 59M. Obviously this will take a much longer time to accomplish. Even if we DRS 5M shares every month from October 31 2021 forward, it would take us until October this year to DRS the 59M shares.

*****My main point is that locking the float is going to take EVERY one of us DRSing 99-100%. There are only 4 things that could change this:*****

#Can't stop, won't stop, til the float's locked!!

#4 KEYS TO LOCKING FLOAT:

1) The word about DRS and GME needs to be spread to the masses outside of Reddit. If every ape would just reach another person or two outside of Reddit, we would lock the float in no time!

2) Enough apes with money tied up in other investments would need to convert those to GME. Please consider trading in your "other investment" now. It's the perfect time. Even IF both squeeze, only GME has a turnaround plan that can launch MOASS. Why split your ammunition with an inferior stock when the float can be locked so much sooner by fighting the war on only one front?!?

3) I know this used to be a point of contention - I welcome HEALTHY discussion in comments - but many apes have a ton of shares with Etoro and other brokers that will not DRS. *****Sell and re-buy elsewhere!!
***** Please don't trust your tendies to a broker that won't DRS!

4) Since Ally/Apex are stopping/undoing IRA's from DRS, this is further confirmation that this is the way. Please consider taking the tax hit (perfect time to do so) and DRS or follow this post:
https://www.reddit.com/r/Superstonk/comments/s9gnp9/drs_your_ira_new_path_without_tax_implications_to/?utm_source=share&utm_medium=ios_app&utm_name=iossmf

This post is meant to be purely motivational and encouraging. I think if and when GameStop releases the CS numbers as of January 29 in their March release, we will be lucky to be at 16M. Don't wait for that number to get off your butt and DRS your max! I don't trust any broker now. I certainly won't trust them not to screw us over during MOASS and/or when they're facing insolvency. Why trust a broker with your millions?!? If they go bankrupt, you could lose everything except SIPC/insurance. I don't say this to scare anyone, I say this because I want you to get your tendies and change the system.

*****Changing the world is what's at stake!!*****

BE THE CHANGE!!

TLDR: DRS 100%! Spread the word.
#LOCK THE FLOAT!!!
