All of this is allegedly and is not Financial advice.

TL:DR The meat and potatoes of it all. If you use a PFOF Broker (\*Robinhood, E-Trade, TD Ameritrade, Ally, Webull, Tradestation, Vanguard and Schwab) transferring first to a DRS friendly broker like Fidelity before you DRS has a great number of advantages both for the individual ape and mankind as a whole.\*

\* \*Many if not all PFOF brokers do not buy some or all of your shares for you when you buy them. The cost basis apes get after transferring from them have shown they scramble for shares when they get transfer requests time and time again.\*

\* \*They take your money and use it to generate more money for themselves and hope to make profit on your shares in the meantime and then help to manipulate the price down so you eventually sell them at a lower price. As well as receiving PFOF from their overlords like Shitadel who front run and again manipulate the price down desperately.\*

\* \*When you apply to DRS through your PFOF broker they will often quote you an unreasonably long time for it to be complete.\*

\* \*There are countless stories from apes about being fucked around by these PFOF brokers when requesting DRS.\*

\* \*They do this for any and all of these reasons; so they can scramble in the background and get real shares for you (sometimes taken from other apes accounts that have yet to transfer), commit yet more fuckery, cancel your transfer and hope you forget about it, buy time to stall and appease their PFOF clients, decide to charge you a fee to help cover themselves, try to figure out how they're going to keep passing Margin Calls if they keep getting DRS requests etc.\*

=====

\* \*Why have the lending rates been so stupidly low for GME for so long? to encourage others to borrow and short GME.\*

\* \*In fact some PFOF Brokers are even PAYING PEOPLE TO BORROW THE STOCK\*

\* \*Why? so that they can keep up the can kicking by providing 'liquidity' AND put downward pressure on the stock helping their margin and leverage risk levels.\*

\* \*What happened in January with the buy button being turned off was that with the massive amount of buy volume for GME and barely any real shares would have been available, most would FTD and the stock would rocket, market crash etc.\*

\* \*So a lot of the shares that were sold in the January run up and since then have essentially been selling you a stock that they had no intention of delivering on.\*

\* \*Once they'd done it a bit it only made sense for them to keep doing it again and again day after day, diluting the stock hoping the apes would stop holding and buying and price would eventually go down and save their margins.\*

\* \*Instead they've just put more fuel in the rocket, a LOT more fuel\*

=====

\* \*How does Fidelity tie in to this? Fidelity had positioned themselves since selling 9m+ GME shares before the Jan run up to be in an amazing position to swallow up their rivals client bases. Compared to their competitors their margin levels and cash balance was probably VERY nice come the sneeze.\*  
\* \*We first saw them take advantage of this after January when a lot of apes transferred to Fidelity from Robinhood.\*  
\* \*It seems that instead of being easy on their rivals (why would they) and letting them do a slow NON-ACAT transfer of shares allowing delivery in 4-6 weeks Fidelity exercised their right and used their\*  
\*\*\*FAT\*\*\* \*cash balance to do a forced buy-in of every share transferred and then send the bill to Robinhood.\*  
\* \*Fidelity doing Buy-Ins and other firms scrambling to keep the Bare minimum margin requirements potentially caused the February Run up.\*  
\* \*These big fat bills coupled with robinhood being still very over leveraged by the high price of GME meant that Robin Hood had to rush a \$5B issuance of convertible notes and warrants with low rates and conditions as revealed in the IPO.\* \*\*\*DICEY DICEY\*\*\*  
\* \*Now DRS is another opportunity to have Fidelity\* \*\*\*fuck\*\*\* \*with the PFOF brokers some more and bring them closer and closer to liquidation.\*  
\* \*A transfer from broker to broker must be completed in 3 days, putting more pressure on the PFOF broker's margin and leverage. They can't stall like they are with DRS requests.\*  
\* \*If Fidelity doesn't receive shares in due time they can then force a buy in from the PFOF broker once the transfer goes through and they need your shares to DRS\*  
\* \*This slams the PFOF broker as they either have to give Fidelity some of their limited supply of real shares or are forced to buy them putting pressure on their balance and risk levels AND they lost a customer.\*  
\* \*From there Fidelity have the fastest DRS times and they have gained a happy customer and damaged a competitor.\*  
\* \*If this information stops being suppressed and enough apes learn why to do this\* \*\*\*then 741 comes along quicker\*\*\*  
\* \*\*\*741 - US Code that pertains to Broker-Dealer Liquidation and Bankruptcy.\*\*\* \*These brokers will crumble and be liquidated and\* \*\*\*the first BIG dominoes towards MOASS will fall.\*\*\*  
\* \*GET out of these AT RISK SCUMMY PFOF BROKERS and make your shares REAL and under your name.\* \*\*\*Speed the process to DRS up and send a big FUCK YOU to your PFOF brokers by transferring to Fidelity first and then DRS.\*\*\*  
\* \*ITS A WIN FUCKING WIN\*  
\* \*KARMA is a BITCH\*  
\* \*\*DRS IS THE WAY\*\*  
\* \*\*EVERY SHARE MATTERS\*\*

\*=====

The aim of this post is to try and boost the signal of this information so it gets seen and understood by as many apes as possible. I tried to distill it into as readable and short a format as possible that would still drill the point home. I still see far too many apes with these brokers complaining about long wait times and being fucked around. \*\*Transfer and force their hand! This info needs to spread!\*\*

I can't take much credit, as all DDs are this was built by standing on the shoulders of other glorious apes that stood before me and wrote quality DD.

This DD in particular could not have been done without the post last week by u/[Full\\_Option\\_8067](https://www.reddit.com/user/Full\\_Option\\_8067/) whose DD **‘The Untold Story Leverage Ratios’** that goes in depth into all of this should honestly have reached the front page of reddit. I would link it but I'm scared of automod. Please click his name and read his post. After spending hours a day everyday on reddit since January I think his DD is up there with the best. As it happens it only got around 2k upvotes. Since I've known this and observed this info not being common knowledge for apes like it **SHOULD** be I decided to make this post and spread it. There are strong reasons to suspect that his post was suppressed and others have also experienced the same shill attacks when talking about this so please help this info spread among apes!

I'll leave you with something I typed in my notes during a period in which I got very angry researching and writing this, me screaming into the void is now me screaming on reddit :)

FUCK YOU, PFOF BANKSTER SCUM. You've smiled at your customers' faces and then stabbed them in the back repeatedly for years! Making billions and trillions from the hardworking Public by selling them IOUs in place of shares and selling their trade data to trash like Shitadel and hiding behind “we offer free trading”! Now we've turned around and we see the knife thrusts coming and we are throwing counters! Eat these transfers, eat this DRS you scum!

**\*\*HOLD\*\***

**\*\*TRANSFER\*\***

**\*\*DRS\*\***

**\*\*EVERY SHARE MATTERS\*\***

PS I think for euro and international apes having trouble with their brokers to DRS the closest equivalent to Fidelity is to transfer to IBKR then DRS

FIN
