You need to have set up your Computershare account \*(See previous post)\*. Note there is a lot of waiting for snail mail letters, but once set up, all you need to do is open a US bank account \*(I used Wise \[formally TransferWise\])\* . Action your Computershare account to “Buy more” GME with your US bank account USD funds and done (sort of) ..... more waiting, 3 days ish, for Computershare to receive funds, then a few more for their broker to buy the shares in your name.

p.s. again, I am a smooth brained Ape and this is not financial advice.
