Hello fellow apes,

So long story short my Mexican broker GMB (Grupo Bursátil Mexicano), the most used broker by Mexican apes in r/GME_Mexico, can't send my shares to IBKR because they stopped receiving shares through the INDEVAL system (Central Securities Depository For The Mexican Securities Market) and all the Mexican brokers use INDEVAL for transferring stocks.

The received shares through this method for the last couple months, that's the way all the Mexican apes have been DRSing their shares. I had all the paper work done and my broker told me they were just waiting for interactive brokers to accept the transfer.

[GBM help chat | Rough translation below](<https://preview.redd.it/k5g42iko80m81.png?width=1102&format=png&auto;=webp&s;=d145baafd1dd48c568ba3983dff5602f80c95c1b>)

I asked my broker what was the delay and the answer was "We were told by Interactive Brokers that they stop receiving GME to their BBVA account though INDEVAL" thats the bank they use to store their Mexican funds.

"They said that GME shares transferred to they BBVA account won't be accepted anymore, they will only received the GME shares to their DTC account number 0534"

This whole thing is super sus because they only reject GME shares, but any other stock different that is transferred through INDEVAL, will be accepted as always, they are only blocking Gamestop. this is exactly the thing I was told when I called the treasury and operations department of the broker.

The only way that any Mexican broker can transfer any shares internationally is using the INDEVAL system, so IBKR is not longer an option for the Mexican apes, so I need help finding another broker that:

- * Is US-based or international (like IBKR)
- * Can be used by a Non-US citizen
- * is trustworthy enough to send my shares. (no Robinhood or similar

My idea is to send my shares to another broker that accepts this INDEVAL system and from there resend them to Computershare, fundamentally is the same thing we were doing with IBKR but with another broker.

I will greatly appreciate all the info and help that can be provided, but also, i will translate and post the information to r/GME_Mexico and help all the Mexican apes that are in the same spot as me.

Thank you ■■■■
