Please support the new addition to DRSBOT that tracks the number of CS accounts per Ape. This recent update will greatly improve the accuracy of estimating the total DRS share count.

#Simply go back to YOUR CS post and comment:

#!DRSBOT:CSx!

where x is the number of different CS account numbers you have. (Many apes have multiple account numbers). **Important: do this even if you only have 1 account or even if you posted long ago.** Otherwise no data is entered for you and if mostly apes with multiple accounts report, it will skew the CSX data higher, which will lower DRS total shares.

Special thanks to roid_rage_smurf and team!!!

After collecting data from the first **2029** apes that submitted a CSX number, the number of CS accounts per ape is 1.32. This reduces the **130,900** (New high score today) CS accounts based off of the current high score to actually **99,166** unique ape CS accounts. (Maff=130,900/1.32) This is why BOT and CS.net numbers differed from GameStop's earnings release number of 5.2M on October 30!

#99,166 x 159.36 = 15.8M shares DRS'd.

This is the current number of accounts per high score 130,900 adjusted/divided by 1.32 because of apes with more than one account, multiplied by DRSBOT average shares per ape.

#3 KEYS TO LOCKING THE FLOAT:

1. We need to **educate the masses outside of Reddit what DRS is and why they should do it.**

2. Apes with money tied up in **"other investments" consider converting those to GME and DRS**. What other investment could possibly compare to GME?!? It's the perfect time before the markets tank. Even IF others can sq—launch, only GME has a massive turnaround plan.

3. Apes with shares in brokers that will not DRS or transfer, such as **Etoro and T212 : think about selling and re-buying elsewhere!!** They don't have the shares anyway, so selling and re-buying hurts nothing! Please don't trust your millions to a broker that won't transfer or DRS! Seriously, go read their TOS. They will screw you!
