1. ■ The **\*\*word about DRS\*\*** and GME fundamentals needs to be spread to the masses **\*\*outside of Reddit\*\***. If every ape would just try to reach 1 other person outside of Reddit each day, the float would be locked in no time! Twitter, FB, real life, etc.

2. ■ Apes with money tied up in **\*\*other investments could convert those to GME and DRS\*\***. This includes taking the tax hit on IRA if you can. Please consider trading in your “other investment” now. It’s the perfect time before the markets tank. Even IF both spike, only GME has a turnaround plan that can launch the rocket. **\*\*IRA DRS new link : \*\***

3. ■ Apes with shares in brokers that will not DRS, such as **\*\*Etoro : think about selling and re-buying elsewhere!!\*\*** They don’t have shares anyway, so selling hurts nothing. Please don’t trust your millions to a broker that won’t DRS!

Great comment from u/mia6ix : “Shorts aren’t closing positions voluntarily, for one thing. Their whole plan was to never close, and they sure aren’t doing it at \$100 or even \$50/share.

For another thing, shares held in eToro aren’t even traded on the real market. Their TOS makes that clear. Apes who “own” shares at these so-called brokers that won’t allow them to DRS are stuck with a position that probably isn’t even real, and will likely be force-liquidated at the first hint of rocket launching. If all those apes dumped these crappy brokers and re-bought shares on the open market AND DRSED them, we’d have the float locked and some real buying pressure, finally.”

**\*\*Changing the world is what’s at stake!!\*\***

BE the change!!

Can’t stop won’t stop til the float’s locked!
