Stocksera was reporting 900,000 to 950,000 GME shares available to borrow - the highest number in the last 6 months.

I was in the middle of writing this post speculating that maybe less shares were being borrowed and that could mean the price was down to the price target someone big wanted it to get to.

Then I refreshed the page and in the last 5 minutes the number of shares available to borrow dropped from 900,000 to 150,000!

Someone might be about to dump 750,000 borrowed shares onto the market!

Buy them and DRS!
