Investors

## The \$GME Dark Pool Stock Split Dividend Theory

Stock is issued as dividend, not  
regular split (for a strategic  
reason, to create a squeeze)

Hedgies naked-shorting \$GME in  
dark pool trading will be forced to  
cover on open market as they will owe  
3 shares for every short

Longs receive stock as a dividend  
- shorts owe stock as it is a  
dividend

This will drive price to the moon as  
they are chasing more than 100% of  
shares issued, and Diamond Hands  
will prevail

Hilarity Ensues

This is entirely theoretical and may or may not happen
