I just got done watching Bill Burr make history by being the first comedian to perform at Fenway Park. He called out the Fed and used the phrase 'ponzi scheme' in front of thirty thousand Bostonians. This was one of those events where peoples phones were locked up so bootlegs will be scarce. I just want to get the word out there because i saw a post recently of him in 2021 talking about GME and the whole stock market "being paused" . He's obviously read up on the situation enough to incle this bombshell as the punchline was they targeted the wrong building on january 6th as people at the fed jumped for joy as they saw protesters go onto the capitol building. I'm drunk and I tried my best but there still might be typos. That being said i just feel like i need to throw this out there becuase in the other post about Bill's podcast in 2021, the comment section talked about reaching out to these guys as out media in lieu of MSM or whatever. Idk what i'm trying to say. I'm not a listener of his podcast like i once was but i know he reads fan emails. Felt fuckin huge.
