Hi a couple of smooth questions:

Everyone is just putting some shares into computershare just to contribute to the infinity pool right ?

Yall aint putting all your shares in there right ?

Wont it be really hard to sell if you put it all in there, coz i heard it takes like a week to sell or am i completely wrong ?

Am i going to to get fucked over during moass if i dont use computershare ?

how would UK apes go about computershare anyway?

I have a an ISA in UK is that good enough ?

(Edit: fixed typo error)
