I want to put these two things together as this seems to me to be the most plausible reason. When you look at these two things combined it just makes sense to me. I couldn't put on the other sub due to Karma.

DRS- take your shares out of the street name and make them be YOURS. While I know the company hasn't directly told us to do this, but Why else would DRS numbers be included in each earnings if it wasn't what they felt we need to do.

741- There have been so many takes on this and the combined two tokens make a lot of sense, but 741 broker liquidation makes the most sense to me. What do you think will happen to your shares if the broker gets liquidated?

Not trying to start a debate on sale limits and everything else just putting out there what I think is so plausible. Have a great weekend everyone!
