Which all the latest MSM reporting about a possible squeeze, the one year anniversary of the first gme sneeze and the recent dip, the best play for the SHF would be to create another sneeze and go big about the FUD.

That's when your ■■ will be tested. It's easy to hold through a dip, it's so much harder to hold through a sneeze, when selling would give you thousands of \$\$\$.

Disclaimer: This is total speculation, just based on how I would play it, if I were in their shoes.
