We all know the emoji RC is most fond of is the shit emoji. Could he simply have been using the pop-corn emoji as a synonym for shit, assuming that we'd all recognise it as such right away since his entire target audience is aware it's the symbol of a shit stock. Maybe he's just tired of using 🍌, wanted to mix it up and looked for another emoji that has come to represent shit. Simple.

Tweet translation "This movie is shit".

This is just a joke obviously, I'm just goofing on the pop-corn apes who actually think the CEO of Gamestop is promoting their stock.
