If everyone is really serious about starting this market crash, the solution has been right in front of everyone's face all along. What is the single most important thing that every SHF, Bank, and Institution care about?!?!?! That's right.... It's cash, guys and girls! If you all wanted to make a statement, you hit them right in their mother F'n wallet!

Here's my idea:

Most people have credit cards and or some kind of loan. Here is the glitch. There is usually a 30 day grace period AFTER the due date of your bill. If you wait till the 28th day after the due date to pay, you will have these companies running scared. Best of all... you don't get a negative mark on your credit score. At worse, you pay maybe a 35 or 45 late fee that you could dispute with them to waive it. If we get enough people to do it, we will be a force to be reckoned with. That just leaves this one question;

How serious are you APES for some changes to this screwed up system? I can't believe we are living in a world where the 1% has tricked the 99% into thinking that we are powerless. It's time to Gamestop.
