Bought in GME 1/29/21 at 350, smooth brained as the rest of y'all, but wow the sentiment is different from Buy button bullshit. Today could/should have been gorgeous, but it has me still feeling tit-jacked as fuck. We have so much more knowledge, we have DRS, we have apes gathering constant info of fuckery, we have an active RC an Co. Jack Sparrowing these fuckers, and we have DFV still above us. We know what to do. Buy, HODL, DRS, jack your tits and stay Zen all in one. See you fuckers on the moon.

I don't even know how to give myself financial advice
