So, I saw this bid come in at the end of the day -

2500 shares for ... \$1.10 - One dollar and ten cents! The Order came from MEMX. MEMX? I did a bit of digging and here are a few screenshots of what I found...

Members Only Trading for Institutions. Why would they use MEMX?... Well Here is a list of Codes, and their corresponding transaction fees. They are all fucking sketchy - but code "Z" is the one I found to be most disturbing - "Routed To Another Market , Removed Liquidity" ...

Insane.

So who funds this operation? Well apparently everyone....

Literally....

Do this infuriate you? It Should....

Another interesting tidbit I came across today is PYTH. (<https://pyth.network/markets/#GME/USD>) A network that tracks trades in real time using blockchain encryption - Check out the price for GME....

2500\$ and has traded for as much as \$5000 WHAT?!

Last but not least - here is a comparison of THE POPCORN STOCK & GME price action just as the MEMX bid came through - corresponds perfectly with a coordinated ladder attack

Be good to each other

END THIS MADNESS NOW!

EDIT : Guys - Check out the month view on the PYTH link. Also keep a close eye on it day in and day out... It will be able to tell us in real time when the Darkpool price spikes. It is spiking at times of critical mass. When the stock is about to make a major move, For Instance - today when we breached the heavy resistance level of 164, very briefly, and on Monday, darkpool prices spikes well into the thousands - They buy at those prices, and then re route the orders - probably going through MEMX (im sure there are others, but MEMX seems to be the Big One) until it is suppressed. CLEARLY someone is paying BIG BUX for those shares at time of critical mass - presumably to buy them in the dark pools for 2-5K a piece and then Bid them for 1.10\$ on the NYSE. to suppress liftoff.

ALSO....

PYTH is VERY LEGIT and I think it can be a very valuable tool moving forward.

I HOPE I WAS ABLE TO PROVIDE YOU GOOD PEOPLE WITH GOOD INFO. I love you ALL. Seriously to the moon and back.
