I have a funded gme wallet and I want to actually USE it. I have no interest in using metamask, I already just started trying to use metamask to buy land on illuvium (bc i'm curious) but I hate the experience so much already I just said fuck it. No I don't want to import my gme wallet into metamask!

Is there a way to use the gme wallet here? I'm super uncomfortable giving my 12 word pass phrase to metamask to import, plus I don't know what happens to my gme wallet if I do import it. So... wtf.

Any other use cases for the gme wallet yet? I have 2 NFTs in it and it feels fucking cool right now but I want to use this thing wherever I can to get a better feel for UX/UI and use-cases. HALP!
