Hello, i'm a mid xx gme holder, most of them on etoro..

I started buying on ibkr few Days ago and started the transfert to cs. (First time, no CS account yet because i can't as à french)

The First time it didn't go through (shares not settled i think) but the second time it's on the way and the shares are no longer in my ibkr account. I was wondering where are the shares during this time when they are not yet on CS ?

Does that means that the transfert worked if they no longer appear in ibkr ?

I have seen People saying it took 3months to get them on cs..

Someone can help me i'm affraid to loose my precious tickets to the moon !

Thanks my friends and sorry for my english ■
