I know I'm not the only one today having issues out of all the NFT's available I just wanted at least one to have in my collection.... At Cost.... Error after error this is by far the worst wallet experience I have had experienced to date... as an avid ape... I am deeply saddened by the fact that I have been unable to purchase one of these NFT's I literally sat and watched each one load and populate for availability and when I went to purchase my wallet would give me an error message....

Any fellow apes with pointers I'm all ears I've changed all my chrome settings to be wide open and accepting everything what am I missing....

Warmest congratulations to all my fellow apes who did get at least one NFT from the Gmerica collection. I wish I was in your ranks.

I wish GameStop had a smoother customer experience for their marketplace that is all... ■
