As an Euro poor, I recently setup a new IBKR account in order to be able to quickly DRS. I made my first deposit which was processed very fast, within 15 minutes it was available and I made my first purchase of the GameStop stock.

Last Monday I made a second deposit and it took more than 24 hours before the deposit was accepted and available in my account.

Could it be that accounts are somehow flagged as Meme keeping account or whatever which triggers other algorithms such as a longer process time?

How much time does a deposit take for other Euro poor who have an IBKR account?

Edit: both deposits were made on a normal working day.
