Hello everyone, recently capital has made it possible to invest in "real stocks" which I suspect are called real because they are probably owned by the DTCC. Is there any way to DRS from capital directly to computershare if this is the case? I own a few "real shares" of GME and want to DRS them but don't know how. I am europoor so I can not move them to fidelity either since fidelity is US only.

Tried to post on superstonk but it gets autoremoved...
