GME!

Hi apes.

I finally got my shares to computershare, but I am fucking retarded.

So I'm from Denmark, but thought it would be smart to create an American WISE bank account. So I updated my banking details in Computershare, but now the system wont allow me to submit tax details, as it looks like I am from America.

I have also registered my danish banking details, however now I have two and the issue still appears. I can't find the fucking delete-my-banking-information-function, so I called a lazy ass Customer Service agent who told me he could do it but it will take 30(!!!!) days.

So please apes, tell me that you have tried the same and can tell me where I can do this myself. It cannot be the case that it has to take 30 days. I'm from Denmark where we are FAR AHEAD on digitalization, so it might be that I just need to wait. But please, please, please let me know if there is something I can do to speed up the process.

I am scared that this will make me miss my Mother of all stonksqueezes.
