Hello animals,

Can I use the [Loopring.io](https://loopring.io/) website to connect my Gamestop Wallet and activate the Loopring L2 using the 'Add assets' and 'Buy with card' feature to instantly buy Loopring? I want to use BANXA, because it has the lowest fees for me. But will it send the Loopring to the Ethereum Layer 1 address? Or will it instantly be on the Loopring L2 address?

Related question:

\- Can I deposit any ERC token on the L1 address without losing it? It's only showing ETH on the Ethereum Layer 1 in the Gamestop Wallet. So what happens if I deposit LRC to this or another ERC-20 token?

\- Is it true that I can use the [Loopring.io](https://loopring.io/) DEX to trade all trading pairs/coins available on the website with my GameStop Wallet?

Your help is appreciated!
