Ok, so for months apes have been posting Memes across all of the subreddits. We spend time making fun of Mayo Boi, Marge'n Call and so on.

Where has all the DD and digging gone? How is it that when you post shit it gets deleted or taken down?

Have we lost da whey? Are the mods and reddit sus?

Edit 3: I think a much better Endgame Theory is [this one](https://www.reddit.com/r/Superstonk/comments/p4cn4o/my_theory_on_the_nftthe_first_gamestop_nft_is_in/). OP connects the recent Moonjam Event which is more relateable. Well who knows if GME and Lego Merge.

The NFT is a game changer and it's building a new environment with Tokens, not owned by the DTCC Members. My Theory.

0. This is a game, and you ain't playing it at all - even now

[The average r/wallstreetbets idiot, chasing returns for a zero sum game](https://preview.redd.it/0xcdxhbzuch71.png?width=3840&format;=png&auto;=webp&s;=c06eaf1d07a4e6d28c18b0f58d0b50b1782033c4)

When u/deepfuckingvalue started this, he went from a portfolio of stocks to GME only. Why would he go ALL IN on a stock, back then when most of us went long on Palatir and shit?

DFV went into the filings and looked up the funds. He searched.

["Why can't we go backwards, like fast, like pedal to the metal backwards"] (https://preview.redd.it/psfahdqwvch71.png?width=3840&format;=png&auto;=webp&s;=512419f42986b296212b29575e8d9faec5b68ef3)

This is about reversing the market as we know it. The NFT Token is only the tip of the Iceberg.

Looking at his old videos we can see a pretty clear picture:

[He looks where no one else looks](https://preview.redd.it/8z9q3vu8wch71.png?width=1864&format;=png&auto;=webp&s;=25f266b288f360bf01b92de3167c8e5f3ea76811)

In my opinion, Gamestop is the **only play** on the market for retail investors. Why? No, it's not because of Ryan Cohen. Not even because of the Short Squeeze [it's a bonus ngl].

Gamestop will become the Oasis. Yes, you read that correctly.

The Oasis from fucking "READY PLAYER ONE"

Remember how we played the game behind the NFT Token Website and everybody was thrilled? The dates aligned with the date the NFT Token was announced, then pushed back? (7/14/21? idk, loing time ago)

The Game is not over yet.

1. DDs have become stiff and almost no one looks at the Fintel Data anymore

In the recent [Victoria Secret DD 1hr Video](https://www.reddit.com/r/DeepFuckingValue/comments/p1yqmh/endgamedd_video_review_for_you_all_cohens_tweet/) the OP goes around and look at ALL of the funds investing into GME. He makes his own assumptions and finally unveils the bubble in the market with MBS and Reverse Repos holding it up for now.

Seriously, most people don't understand it. Most are like "wtf, xx k % gains? must be a decimal error".

Oh, yeah. IT'S JUST A BUG BRO. GO AWAY, NOTHING TO SEE HERE!

[Guess who else had to go though this, eh?](https://preview.redd.it/vm250wmqxch71.png?width=3840&format=png&auto=webp&s=bf01a51823b59dea03268c6091d3f86b7b7678a0)

We look at this shit and turn it away, because it's unconfirmed, all Caps and all Reddit Subs have become increasingly harsh towards new DD that isn't build on bedrock.

The fun in this Game, yes, game we are playing is that nothing is certain. Like in the Film "Ready Player One", we have to follow dead ends and try again.

There are many shills going around and actively FUDding people about him. I have personally seen two Discord Members p*nz and g0* (to not expose them completly) going around EVERY SUB this OP has been though and spreading lies, fear about him. They even collected info about him.

Shills at their best.

Solving the riddles laid out is what DFV did. We got off that path. We play on Planet Doom (Playing options and wasting out energy and ressources) while he is sitting at home, banned from writing anything further due to legal, rich people shills and much more.

Why was he Tweeting these weird things? Was it all just for fun?

Only one player keeps playing this game, hunting the second key to this riddle and his name is u/alwaysasadbuttruthful

Yes, the majority of his posts are all caps, hard to read but after watching the 1hr video I think I get the most important parts. That DFV went deep. Really, really deep.

Now let me be clear, I don't think OP is 100% right with his posts. I think yes he found some interesting shit but only if many apes look at it, it will get solved.

The repeated organized attacks and apparently hacks he had to endure speak volumes about what he could have uncovered.

[I think even Steve might be a distraction lol, look at](https://preview.redd.it/zlnfetzt6dh71.png?width=960&format=png&auto=webp&s=8be14b970c73b1b07e4ec697de76e1e7581f61dd)

2. Historic Data, looking how the system was created and more

Parzival in "Ready Player One" researched shit that was though to be a dead end over and over again, until one day we realized that the answer was always there. Everybody has left after the January Squeeze and now we write DD about smaller plays in the system and around GME.

DFV as well, looked into the past. If you go into different funds and their calls/puts - derivatives, you can find that some of these made a merger, resulting in a payout of more than 100% of the shares to each of the guys sitting in the upper seats. Yeah, wtf.

<https://preview.redd.it/lnhpcjib2dh71.png?width=1366&format=png&auto=webp&s=79c59463e5f4cb16f89085fcf72d191efadec884>

this is a snip from the golden ocean group + knightsbridge merger from a few years ago. what you think of the # of outstanding shares that got converting and wiped away during the merger?

61.7% of the shares to each person. More than 100%. Yeah...

3. The Derivatives are the play of the rich - until they get deleted

How does one get rid of the institutions that plague your stock? How do you Shift + Del those manipulating entities and get going with your stocks?

Well, [Brick by Brick], Lego is the answer.

<https://preview.redd.it/nu6ptxt03dh71.png?width=678&format=png&auto=webp&s=8425bd4c8e633d1320a3044910b880cf34f118ef>

u/alwaysadbuttruthful made a [Post](https://www.reddit.com/r/Superstonk/comments/p3yn7f/rip_dumbass_decoded_moass_confirmed_buckle_tf_up/) where he laid out the basis for his thesis.

By converting all the Retail Float into Class B shares and giving that with the Lego UNIT to the Shareholders in a Merger, the result is that the Class A shares for the original Gamestop become a dead piece of paper for the institutions, resulting in a 100% retail and insider ownership over the Company, that can't be shorted, lend or anything.

[Edit 2: \$LEGO isn't Lego (R) - fyi]

Power to the Players.

All your Base belongs to us now.

Anything that the DTCC can't handle is outside of the reach of the rich 1% that play against you on doom planet, sucking up your cash every time you die (invest wrong etc).

This isn't a 69m/share Short Squeeze. This is the death of the former Kings of the Financial World.

The Game Stops now.

All the Banks and Institutions that have had control over the Western World Finances for the last idk how many hundred years, all of them can be found today in various organisations.

Their power was Cash. But an NFT is an NFT. It's unique. Non Fungible.

The Millions won't even matter for what is about to come to them.

4. Playing the Game - How to find the easter eggs again

The original creator of the NFT Art sold his first creations for real money, and it is connected to a real game with portals and so on. You eventually find his gallery where you can buy stuff from the store.

This is the future. A world where you have the power over your stuff. Decentralized.

In theory this is the opposite of the world we live in and opens up so many possibilities while crushing the former elites.

If Gamestop really does a Merger with Lego, giving out UNITS with GME Tokens, and the File Name for the NFT .mp4 that is animated has "817" in the file name, then this coming Tuesday Morning

will go down in History.

The removal of the powers at play is bigger than anything.

5. A neat comment I found

[Citadel might get YEETED? Oh my....](<https://preview.redd.it/88rnvjx57dh71.png?width=1296&format;=png&auto;=webp&s;=34645a6419e356c79eeb5116f81ef00bc0ebace6>)

Find the missing keys guys

EDIT: 2 posts around the same time have found similar or the same stuff I did. Lol!

[This one explains pretty much the same](https://www.reddit.com/r/GME/comments/p4cw38/the_moass_key_this_post_needs_to_be_seen_and_it/). Lol, mate, the timing hahahahaha! People are beginning to understand things here.

[And this one](https://www.reddit.com/r/Superstonk/comments/p4cn4o/my_theory_on_the_nftthe_first_gamestop_nft_is_in/)? Yeah, Tits Jacked

EDIT 4? 5?

Would you look at that:
