All of my GME shares are DRS'd. When I moved all my Plan holdings to Book a few months ago, I found out the fractional shares I had were automatically sold. But what I am trying to figure out is where the money went from those.

Few days ago I received an alert about what seemed to be a non-cashed check, so I assume they tried to mail the check to me which never reached me.

So now I'm just trying to make sure all my bases are covered, and to understand if I am able to sell a share and actually receive the proceeds from it without a physical check getting lost.

I set up the international wire info as well, but I'm not sure how to confirm everything is set up correctly without selling a share.

Has anyone outside US sold shares on CS before? Or fractional shares? Any problems with physical checks?

Thanks.
