Then you will still have the same number of shares with your broker as you did before the split.

The amount of shares DRS'd since the splividend announcement are absolutely incredible!! I can't WAIT to see what the rate of DRS is after the GME price splits!

Also, don't forget that GameStop's 2nd quarter ends Saturday July 30. Let's do everything in our power to make the Q2 official DRS numbers from GameStop shock the world! A BIG number (55% of free float?) could have a staggering effect on FOMO investors and FOMO DRSers!

Due to the extreme, early success of the NFT marketplace in its infancy, I have never been so hyped about GameStop's future! However, I still think, like I have all along, that Wall Street and friends are more powerful than many of us realize and that only 2 things can launch MOA*S in any kind of reasonable timeframe: 1) GameStop officially becomes profitable OR 2) we nearly lock the full float. We STILL need to educate the masses outside of Reddit about DRS, especially the existing GME shareholders. There could very well be 100's of millions of shares held by retail outside of Reddit that have no clue what DRS is!

My team's educational DRS project continues to see strong traffic every day despite us pausing ads due to 1) my and u/derhyperschlaue's overlapping vacations as well as 2) regrouping after the ad campaign drama. Next week, we will begin to move forward again toward in a new way, but toward the same goal, having learned from our mistakes, feedback from the community, and brainstorming with everyone on our team.
