What Happens Now

The trick in a speculative frenzy lies in selling, not buying. Many investors were burned in 2021 because they kept their shares after achieving a fat gain.

The way to win is to be ready to sell at a moment's notice and use options against your position to hedge your risk. Most retail investors don't know how to play that game, which leads to losses.

On the date of publication, Dana Blankenhorn held no positions in any companies mentioned in this article. The opinions expressed in this article are those of the writer, subject to the InvestorPlace.com [Publishing Guidelines](#).
