Some folks on the larger subreddits were interested in Doctor Marco Metzler's prior companies - the German doctor with financial services experience on LinkedIn (see link at the bottom of this post) who posted about Evergrande and who is now posting about GME and his gold-backed e-currency that he wants to develop - so I wanted to share this resource:

<https://opencorporates.com/officers?q=marco+metzler&utf8;=%E2%9C%93>

OpenCorporates is one of my favorite data sources for this kind of data because they include data lineage / data 'provenance' information for all of their data. For example, on this page -

https://opencorporates.com/companies/de/F1103R_HRB133444 - you can see that the `Source` is the ****Gemeinsames Registerportal der Länder****, <https://www.handelsregister.de/>. And the data was scraped/obtained from the ****Gemeinsames Registerportal der Länder**** on 12 Nov 2018.

I'm somewhat suspect of very vocal people jumping on the bandwagon and trying to ingratiate themselves with the Ape community especially this 'late in the game' so in the interests of transparency I wanted to link to that information so that Apes could do their own research / inform themselves.

LinkedIn link by Marco Metzler about Evergrande: https://www.linkedin.com/posts/dr-marco-metzler-403341163_insolvency-petition-on-evergrande-will-be-activity-6869615636763418624-jnkP

Moderators, feel free to DM me and I can remove the link to the OpenCorporates page if it's 'bad form' to link to publicly-available data about folks. I'm more of a lurker on Reddit 'til recently so I don't know what is allowed on Reddit now as compared to five years ago in terms of public data about companies, etc. Cheers!

Edit: cannot spell; corrected some typos.
