Is_self: True

I'm putting together a new and unique Ratio challenge. As I do, the broker that I choose to go with for the entirety of this challenge is important.

Based only on the following, which do you prefer:

- Mobile App Interface (Stock/Option/Crypto) trade placement
- Trading Hours(Not that only WeBull currently allows premarket trading)
- Charts, Alerts, Watchlists, News

Once this poll expires, the winner will most likely be the Broker/App chosen.
